# Print Optimization 2.0

## DEVICE REFRESH & CONTINUED IMPROVEMENTS

Cameco has realized many substantial improvements in its print environment since moving forward with WBM's Managed Print offering. These improvements include a sizable cost reduction, reduced environmental footprint, automatic toner provisioning, improved functionality, and the ongoing optimization within a challenging environment.

Perhaps the most important win is a much more positive end-user experience; standardized models that are carefully selected to meet user requirements have been deployed, and everyone has been trained on its use to ensure maximum productivity.

## Cost Savings

### TOTAL COST REDUCTION

Since Introducing Managed Print

### ADDITIONAL COST REDUCTION

Through Optimization 2.0

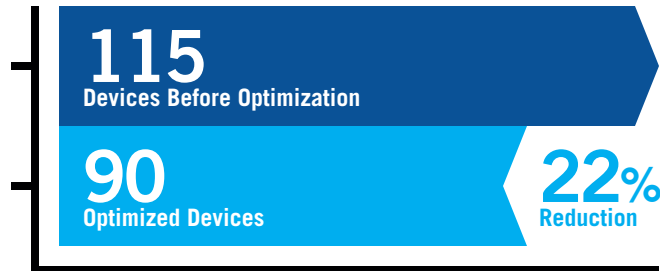

### ENVIRONMENTAL RESULTS

Since Introducing Managed Print

# Device Reduction

## TOTAL DEVICES SUPPORTED

# Environmental Performance

## WHAT WE LEARNED

In **1 Year**, Cameco's current print environment generates a total of 472,188 kg's of CO2 emissions – equivalent to the following:

- The **ANNUAL** electricity used in 5.4 homes for one year
- The **ANNUAL** emissions from 8.3 passenger vehicles
- 16,716 liters of gasoline
- 91.3 barrels of oil
- The **ANNUAL** carbon capture of 32 acres of pine forest in one year

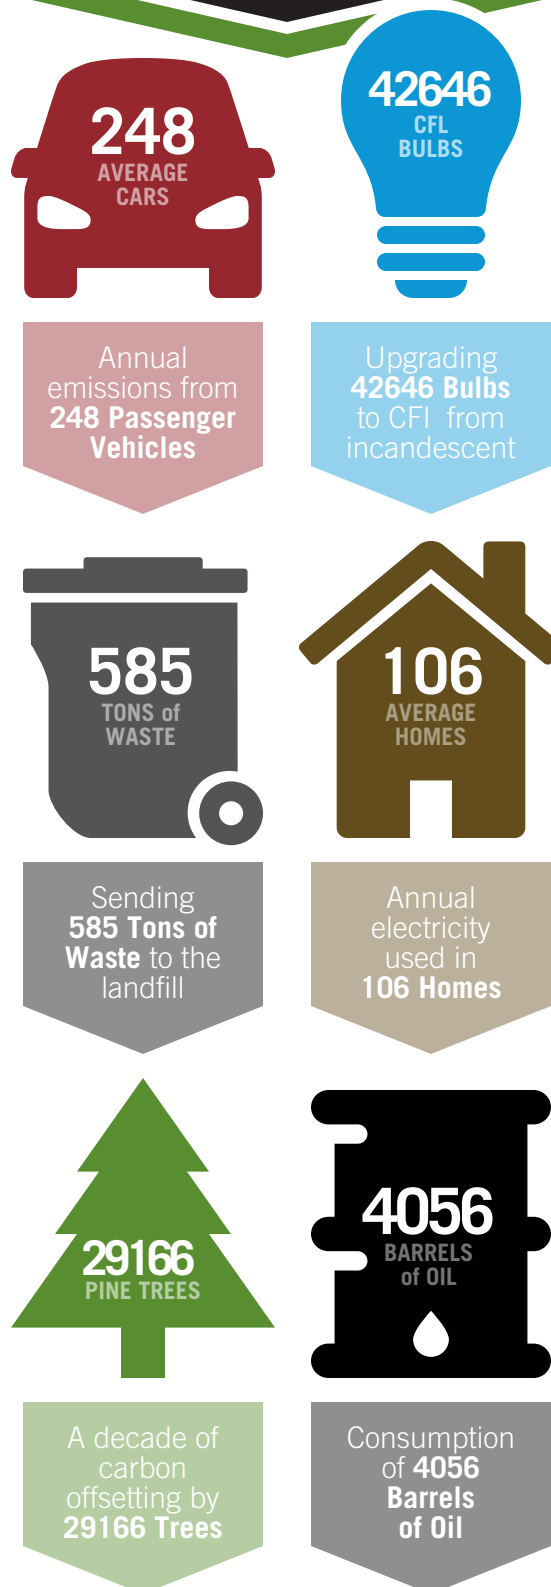

## WHAT WE ACCOMPLISHED

The optimization of Cameco's print environment has reduced Yearly CO2 emissions by 28,224kg's, a 6% reduction; kWh of electricity has been reduced by 1,872hrs, an 18% Reduction. These reductions are equivalent to:

- The **ANNUAL** electricity used in 0.3 homes
- The **ANNUAL** emissions from 0.5 passenger vehicles
- 1,003 liters of gasoline
- 5.5 barrels of oil
- The **ANNUAL** carbon capture of 1.9 acres of pine forest in one year

## REDUCTION EQUIVALENTS

Since Introducing Managed Print

# Benefits

## OPTIMIZATION 2.0 INTRODUCED NEW EFFICIENCIES TO THE CAMECO ENVIRONMENT:

- Printed output sent to devices under Optimization 2.0 will not be released until users authenticate at the device, which will intrinsically **Enhance Cameco's Security** position for all printed output.
- Jobs sent to the **Follow-You-Print** solution can be later released at ANY designated device in the Cameco fleet. Travelling users can print anywhere without having to install the local printer on their computer before printing.
- Immediate **Operating Cost Reduction** to the corporation through the elimination of print jobs that would otherwise be abandoned.
- **Advanced Scanning Workflow** including Scan to PDF, Scan to Word, Scan to Excel, and OCR capabilities.
- The end-user experience will see improvement through **Card-Tap Authentication**. This eliminates the manual input of credentials at the device; authentication is as easy as tapping a Cameco ID card on the device.
- **Extensive Reporting Capabilities** track usage by individual users or departments. Summary, detailed and total activity reports are available and data can be exported for analysis.
- **Environmental Footprint Reduction** through the elimination of unretrieved print output.
- **Confidential Print Every Time**
- **Elimination of Sorting Issues** where end user's jobs are being mixed together.
- **Continuous Savings** beyond one print life-cycle.
