WBM Named one of the World's Most Progressive Information Technology Service Organizations

10th Annual MSP501 Ranking and Study Now Places WBM at Number 31 in the World

WBM now ranks among the world's most progressive 501 Managed Service Providers (MSPs), according to MSPmentor's 10th-annual MSP 501 Worldwide Company Rankings.

The top MSP 501 companies ranked this year include organizations from around the world and from diverse technology and business backgrounds. Collectively, they amassed \$14.48 billion in total revenue, up more than 15 percent from a year earlier.

The complete 2017 MSP 501 list is available at MSPmentor.net. In addition to honoring WBM, this year's MSP 501 list and study showcases the top ranked MSPs worldwide.

"The evolution within WBM has been a privilege to be a part of, and it is a testament to the people we have been so fortunate to have around us. We are so grateful to our clients and partners, for allowing us to take part in their own goals, and the missions that they are pursuing," said Brett Bailey, Vice President & Partner at WBM.

“To grow and succeed within the technology services sector is difficult, and so simply to appear on a list of the World’s top technology service providers is an honour. To now be climbing that list, into the top 50 and now at number 31 in the world is more than anything a validation of the work, the community, and the values that are driving us. All together, it has come to represent something pretty special.”

“On behalf of MSPmentor, I would like to congratulate WBM for its recognition as an MSP 501 honoree,” said Aldrin Brown, Editor in Chief, MSPmentor. “The managed service provider market is evolving at a rapid pace and the companies showcased on the 2017 MSP 501 list represent the most agile, flexible and innovative organizations in the industry.”

The 2017 MSP 501 list is based on data collected by MSPmentor and its partner, Clarity Channel Advisors. Data was collected online from Feb. 16 through May 15, 2017. The MSP 501 list recognizes top managed service providers based on metrics including recurring revenue, growth and other factors.
