WBM Earns CEA Awards in Multiple Categories at CDN Ceremonies in Toronto

[Solutions by Western Canada's WBM Technologies Inc.](#) earned CEA awards in the category of Best Security Solution in Canada, and Best Mid Market Solution in Canada at a ceremony hosted by CDN Magazine September 29th in Toronto.

The Mid-Market Solution award recognized the WBM technical team for creating a highly available, highly scalable IT solution for provincial crown corporation SaskWater. The new data center environment is powered by transformative hyper converged Nutanix technology, providing a highly scalable and configurable solution which delivers full business continuity and disaster recovery, and is completely managed.

The award in the Best Security Solution category recognized the strategic effort by WBM to get in front of a new attack sector — ransomware attacks against companies of any size. The multi stage [Managed Security Solution](#) available to companies ranging from small offices to large organizations across multiple locations has been adopted by companies across Western Canada due to its affordable, fully managed, approach which requires no upfront costs or investment.

2017 CEA Best Security Solution Winners

"It's an honor to see our teams recognized among our peers in the IT sector nationally. These are great organizations to be ranked among, and we are very grateful to be recognized" stated Brett Bailey, Vice President at WBM Technologies. "The work that our teams have done to deliver in each of these areas for our client community is exceptional. Awards such as the CEA's we've received here not only validate the caliber of our team's effort, but also the importance of their work."
